Subject Index

Volume 37

Absorption
  intestinal
    sitosterol, stigmasterol, and fucosterol, 805
    tin and zinc, 566
  iron, coffee and, 416
  vitamin D, in azotemic rat, 403
  whole body counting (human), 652
Acid
  amino
    dicarboxylic, infused, effect in infants, 99
    growth in rats with renal failure, 201
  ascorbic
    oral contraceptives and, 329, 330
    status and supplementation in adult males, 532
    supplementation, copper status in men, 553
  bile, taurine prevents cholestasis induced by lithocholic acid sulfate in guinea pigs, 221
  fatty
    changing patterns of human milk lipids during lactation, 612
    Finnish boys, 848
  folic, cervical dysplasia, 332
  keto, growth in rats with renal failure, 201
  linolenic, deficiency, involving neurological abnormalities, 157, 159
Acidosis
  HCl-induced, 201
  whole body nitrogen kinetics and, 201
Activity, assessment of energy expenditure, 461
Adipocyte, mobilization of triglyceride from, during weight reduction, 749
Adipose tissue, lipoprotein lipase, nutritional induction, obesity, 974
Aging, rate of repair of iron-deficiency anemia and blood loss anemia (rat), 904
Alcohol, energy, macronutrient intake, obesity and, 295
Alcoholism, visceral proteins in, 216
Amino acid
  dicarboxylic, infused, effect in infants, 99
  growth in rats with renal failure, 201
Anemia
  iron-deficiency and blood loss (rat), 904
  malnutrition in Columbian boys, 834
  megaloblastic, in Israel, 855
  peroxidative damage to erythrocyte membrane in iron deficiency, 26
Announcements, 172, 335,
Anorexia nervosa, estimates of daily energy expenditure, 468
Anthropometry
  marginal malnutrition in Columbian boys, 119
  Mexican-American migrant children in northern California, 828
  nutritional
    bony chest breadth as frame size standard, 315
    status of Mexican children, standards, 683, 684
Apolipoproteins, alimentary lipemia, 233
Apoproteins, fatty acids and, 355
Arginine, wound healing, 786
Ascorbic acid
  oral contraceptives and, 329, 330
  status and supplementation in adult males, 532
  supplementation, copper status in men, 553
Asparagine, enzyme-induced, glutamine depletion, immune system function and, 1031
Aspartate, effect of infused dicarboxylic amino acids in infants, 99

Bile acids, taurine prevents cholestasis induced by lithocholic acid sulfate in guinea pigs, 221
Biotin, deficiency, in total parenteral nutrition, 185
Bitrochanteric breadth, elbow breadth as measure of frame size, 311
Blastogeneois
  in iron deficiency, 15
  restoration by hemin, transferrin, and ferric chloride in iron-deficient lymphocytes (mice), 557
Blood
  capillary, measurement of circulating ferritin, 307
  loss, anemia, (rat), 904
  status of vegetarians, nonvegetarians, and cancer patients, 114
  venous, measurements of circulating ferritin, 307
Blood pressure
  potassium and sodium balance, 583
  role of potassium in vegetarian diet, 755
Body composition
  new method for estimation, total body electrical conductivity, 735
  water content of lean tissue and body fat estimation (rat), 663
Body water, lean tissue and body fat estimation (rat), 663
Body weight, reproductive histories of women, 862
Bone disease, sulfate as factor in hypercalciuria associated with total parenteral nutrition, 108
Bone physiology, in adult lacto-ovo-vegetarian and omnivorons males, 453
Book Reviews, 168, 334
Brain
  development, maternal sodium restriction, 43
  vitamin B_{12} analogues (human), 774
Bran
  diet, mucosal cell proliferation in intestine (rat), 945, 954
  wheat, bioavailability of iron from, 31

Abstracts submitted to the 23rd Annual Meeting of the AJCN were published on pages 695 through 734 of the April issue of AJCN. Authors and subjects are not indexed here.

© 1983 American Society for Clinical Nutrition

Breast cancer, reproducibility of diet history questionnaire in study of, 981
Breast milk, intake, determination, 996
Breath hydrogen, lactose malabsorption in Australian Aborigines, 449
Bypass
  intestinal, hepatic protein-synthesis and secretion after (rat), 82
  jejunoileal, hepatic protein synthesis and secretion after (rat), 82

Calcium
  excretion in adult males, 8
  hair zinc levels and water hardness, 37
  metabolism, meat protein and, 924
Cancer
  appraisal of "*Diet, Nutrition, and Cancer,*" 495
  breast, reproducibility of diet history questionnaire in study of, 981
  hormone-dependent, selenium status in, 114
  lung, dietary cholesterol and, 192
Capillary blood, measurements of circulating ferritin, 307
Carbohydrate
  dietary, second meal glycemic response and, 152, 153
  effect of coingestion of fat on glucose, insulin, and gastric inhibitory polypeptide responses to, 941
  effect on plasma and erythrocyte glutamate levels in humans ingesting large doses of monosodium glutamate, 961
  refeeding after fasting (rat), 396
Caries
  dental, South African interracial patterns, 682
Carnitine, -lysine, conversion in adult men, 93
Carotenoids, vitamin A in blood, 147
Casein, gallstone formation (hamster), 802
Cell growth, effect of dietary fat (rat), 361
Ceruloplasmin, ascorbic acid supplementation and copper status in men, 553
Cervical dysplasia, folic acid and vitamin C in, 332
Chest breadth, bony, as frame size standard, 315
Children
  assessment of energy expenditure, 461
  hyperactivity, diet and, 161
  Mexican, nutritional status, 1010
  Mexican-American, anthropometry, 828
  phenylketonuria, protein requirements, 930
  preschool, hair zinc levels and water hardness, 37
  selenium deficiency in total parenteral nutrition, 319
  serum fatty acids in Finnish boys, 848
Children (*see also* Infants)
Cholestasis, induced by lithocholic acid sulfate in guinea pigs, prevented by taurine, 216
Cholesterol
  absorption, sitosterol, stigmasterol, and fucosterol, 805
  blood lipid distribution of hyperinsulinemic men consuming fructose, 740
  changing patterns of human milk lipids during lactation, 612
  dietary
    decreases serum level of zinc, 918
    lung cancer and, 192
  in diabetic rats, 244
  plasma
    dietary fats and, 355
    levels
      determinant of glucose tolerance, 155
      effects of foods consumed on, 883, 884
Chromatography, high performance liquid, vitamin B_6 in human milk, 867
Coffee, iron absorption and, 416
Colon, function, dietary gum arabic (human), 368
Colostrum
  maternal nutritional status on immunological substances in, 632
  versus mature milk (rat), 52
Community nutritional status, xerophthalmia and, 645
Contamination iron, iron absorption from Asian meals containing, 272
Contraceptives
  oral, ascorbic acid and, 329, 330
  vitamin fluctuations in blood in relation to menstrual cycles and treatment with (baboon), 518
Copper
  content of human milk, 443
  deficiency, aging of brain, 540
  excretion in adult males, 8
  oxygen consumption and, 407
  serum, cholesterol decreases serum level of zinc, 918
  status in men, influence of ascorbic acid supplementation, 553
  supplementation, marasmus, 898
Cord blood, erythrocyte manganese in, 457
Coronary heart disease, relation to diet, 669
Corrections, 689, 1031
Corrinoids, in tissue, vitamin B_{12} analogues in human red cells, liver, and brain, 774
Creatinine, urinary, muscle mass method, 478
Cyst(e)ine, measurements during total parenteral nutrition, 188

Densitometry, bone mineral mass in males, 453
Dental caries, South African interracial patterns, 682
Deuterium dilution technique, determination of breast milk intake, 996
Diabetes
  dietary fiber, glucose tolerance, and gastric emptying, 376
  genetic, zinc status (mice), 382
  noninsulin-dependent, dietary fiber, glucose tolerance, and gastric emptying, 376
  vitamin E in plasma and platelets in, 641
Diabetes mellitus
  diet and nutrient absorption, 244
  zinc status (mice), 382
Diet
  appraisal of "*Diet, Nutrition, and Cancer*" 495
  changes, relation to mortality rates, 685, 687
  childhood hyperactivity and, 161
  comparison of dietary methods in nutritional studies, 300
  food intake measurement, 139
  medium-chain triglyceride, impedes fat deposition, 1
  modification, uptake of cholesterol in diabetic rats, 244
  relation to coronary heart disease, 669
  sample size in dietary studies, 473
  vegetarian children, 815
Diet history, questionnaire, reproducibility, in study of breast cancer, 981

Diet recall data, sources of variance, 986
Dietary cholesterol, lung cancer and, 192
Dietary fiber
  changes in diet over 10 yr, 287
  changes in energy and macronutrients during 10 yr of follow-up (Zutphen study), 287
  mucosal cell proliferation in intestine (rat), 945, 954
Dietary methodology
  food intake measurement, 139
  sources of variation in dietary recall data, 986
Dietary protein, mineral utilization and, 8
Dieting, muscle function during, 133
Digestion, pectin, in humans, 253
Dysplasia, cervical, folic acid and vitamin C in, 332

Elbow breadth, measure of frame size, 311
Elderly, healthy, vitamin C status in, 329, 332
Electrical conductivity, total body, new method for estimation of body composition, 735
Energy
  balance regulation, effect of dietary-induced obesity (rat), 387
  changes
    during 10 yr of follow-up (Zutphen study), 287
    in diet over 10 yr, 287
  expenditure
    assessment, 461
    nitrogen balance, parenteral nutrition and, 930
    normal thermic effect of glucose in obese women, 87
  intake
    determination of breast milk intake, 996
    food consumption, activity, body fatness and, 278
    sample size in dietary studies, 473
  macronutrient intake, obesity and, 295
Erythrocyte manganese, measurements in Japan, 457
Exercise
  in overweight men, effects on plasma lipids and lipoproteins, 71
  influence on food intake in rodents, 156
  maximum, consequences, malnutrition in Columbian boys, 834
  riboflavin requirements and, 509

Fasting
  muscle function during, 133
  refeeding after (rat), 387, 396
  water content of lean tissue and body fat estimation, 663
Fat
  congestion, effect on glucose, insulin, and gastric inhibitory responses to carbohydrate and protein, 941
  deposition, medium-chain triglyceride diet impedes, 1
  dietary
    effect on intestine and pancreas (rat), 361
    plasma lipids and, 355
Fat cell, mobilization of triglyceride from human adipocytes during weight reduction, 749
Fatness, body, food consumption, activity and, 278
Fatty acid
  changing patterns of human milk lipids during lactation, 612
  serum, Finnish boys, 848
Ferritin, circulating, use of capillary blood for measurements of, 307
Fiber
  coarse wheat bran, effects on plasma lipids and lipoproteins in overweight men, 71
  dietary
    changes in diet over 10 yr, 287
    changes in energy and macronutrients during 10 yr of follow-up (zutphen study), 287
    effect on gastric emptying in diabetics, 376
    mucosal cell proliferation in intestine (rat), 945, 954
  high and low energy density diets, 763
  leguminous, rate of hydrolysis, 66
Folate
  absorption, in aged rats, 262
  deficiency, megaloblastic anemia in Israel, 855
  intestinal, transport, in aged rats, 262
  malabsorption, in aged rats, 262
  plasma, status, of adult males, 768
  status, of adult males, 768
Folic acid, cervical dysplasia, 332
Folyl conjugase, pancreatic, folate malabsorption in aged rats, related to low levels of, 262
Food
  consumption, activity, body fatness and, 278
  intake
    energy, macronutrient intake, obesity and, 295
    influence of exercise on, in rodents, 156
  preferences, ethnic sales of high-sugar products, 622
  ethnic sales of high-sugar products, 622
Frame size
  elbow breadth as measure of, 311
  standard, bony chest breadth as, 315
Fructose, blood lipid distribution of hyperinsulinemic men consuming, 740
Fucosterol, lymphatic absorption, 805

Gallstones, formation (hamster) 802
Gestation, length, nutritional composition of human milk and, 810
Glucose
  dietary carbohydrate and second meal glycemic response, 152, 153
  in obese women, normal thermic effect, 87
  infusion, thermogenesis after, 603
  inhibitory polypeptide responses to carbohydrate and protein, effect of coingestion of fat on, 941
  tolerance
    diabetics, effects of dietary fiber, 376
    level of plasma cholesterol, determinant of, 155
Glutamate
  effect of infused dicarboxylic amino acids in infants, 99
  plasma, concentration in humans ingesting monosodium L-glutamate modulating effect of Sustagen on, 194
Glutamine, depletion, enzyme-induced asparagine, immune system function and, 1031
Glutathione peroxidase, bioavailability of selenium to Finnish men assessed by, 887
Granulocytes, neutrophilic, effect of Intralipid on, 256
Growth
  brain, maternal sodium restriction, 43
  cell, effect of dietary fat (rat), 361
  colostrum versus mature milk (rat), 52
  in rats with renal failure, 211

Growth—(*Continued*)
marginal malnutrition in Colombian boys, 119
vegetarian children, 815
Guar, dietary fiber, mucosal growth, cell proliferation in intestine (rat), 954
Gum arabic, metabolism (humans), 368

Hair
loss, biotin deficiency in total parenteral nutrition, 185
zinc, levels, water hardness and, 37
Heart disease
coronary, relation to diet, 669
ischemic, vegetarianism, iron and, 882, 883
Heart rate, estimates of daily energy expenditure, 468
Height
elbow breadth as measure of frame size, 311
vegetarian children, 815
Hemin, restoration of blastogenesis by, in iron-deficient lymphocytes (mice), 557
Hepatomegaly, after jejunoileal bypass (rat), 82
Hydrolysis, rate, starch, 66
Hyperactivity, childhood, diet and, 161
Hypercalciuria, associated with total parenteral nutrition, sulfate as factor in, 108
Hypercholesterolemia
familia, 347
sucrose polyester in, 339, 347
Hyperinsulinism, blood lipid distribution, 740
Hypertension
potassium and sodium balance, 583
vegetarian diet, role of potassium, 755
Hypocupremia, copper supplementation during recovery from marasmus, 898
Hypoproteinemia, after jejunoileal bypass (rat), 82

Ileostomy, pectin digestion in humans, 253
Immune system, enzyme-induced asparagine, glutamine depletion and, 1031
Infants
effect of infused dicarboxylic amino acids in, 99
feeding, human milk nutrients during weaning, 61
nutrition, 810
phenylketonuria, protein requirements, 778
premature, 810
Infants (*see also* Children)
Infections, nutritional status of Mexican children, 1010
Insulin
diabetes, dietary fiber, glucose tolerance, and gastric emptying, 376
effect of dietary-induced obesity on energy balance regulation (rat), 387
inhibitory polypeptide responses to carbohydrate and protein, effect of coingestion of fat on, 941
normal thermic effect of glucose in obese women, 87
resting metabolic rate in obesity, 595
Intestine
effect of dietary fat (rat), 361
growth-promoting effects, colostrum versus mature milk (rat), 52
large, pectin digestion in humans, 253
mucosal cell proliferation in, wheat bran diet (rat), 945, 954
small, pectin digestion in humans, 253
Intralipid, effect on mononuclear and polymorphonuclear phagocytes, 256

Iron
absorption
coffee and, 416
food, from Asian meals, 272
from Asian meals containing contamination iron, 272
balance, fetal (rat), 910
bioavailability, from wheat bran in pigs, 31
contamination, iron absorption from Asian meals containing, 272
content of human milk, 443
deficiency
anemia (rat), 904
blastogenesis in, 15
blastogenic response of splenic lymphocytes in (mice), 557
peroxidative damage in, 26
excretion in adult males, 8
fetal, balance (rat), 910
nutriture, folate status of adult males, possible relationships with, 768
placental, supply (rat), 910
supplementation, in pregnancy, 429
vegetarianism, ischemic heart disease and, 882, 883
whole body counting (humans), 652
Ischemic heart disease, vegetarianism, iron and, 882, 883
Isotopes, stable, infusion experiments, 1004

Keto acid, growth in rats with renal failure, 201
Kidney, failure, growth in rats with, 211
Kinetics, whole body nitrogen, in acidosis, 201

Lactation
copper, iron, and zinc content of human milk, 443
maternal nutrition and milk antibodies, 632
Lactose
intolerance, in Australian Aborigines, 449
malabsorption, in Australian Aborigines, 449
Lentils, rate of hydrolysis of legume starch, 66
Linolenic acid, deficiency, involving neurological abnormalities, 157, 159
Lipemia, alimentary, 233
Lipids
plasma, effects of coarse wheat bran fiber and exercise on, 71
serum
dietary gum arabic (humans), 368
fatty acids in Finnish boys, 848
Lipolysis, alimentary lipemia, 233
Lipoprotein
effects of coarse wheat bran fiber and exercise on, 71
fatty acids and, 355
high-density, serum zinc and, 918
lipase
alimentary lipemia, 233
adipose tissue, nutritional induction obesity, 974
triglyceride-rich, alimentary lipemia, 233
Lithogenic index, gallstone formation (hamster), 802
Liver
dysfunction, bypass-induced (rat), 82
vitamin B_{12} analogues (human), 774
Lung cancer, dietary cholesterol and, 192
Lymphocytes, splenic, from iron-deficient mice, impairment of blastogenic response, 15
Lysine, -carnitine conversion in adult men, 93

Macronutrients
changes
during 10 yr of follow-up (Zutphen study), 287
in diet over 10 yr, 287
Magnesium
excretion in adult males, 8
oxygen consumption and, 407
Malabsorption, lactose, in Australian Aborigines, 449
Malnutrition
lysine-carnitine conversion in adult men, 93
marginal, Colombian boys, 119, 834
protein-calorie, immune responses (guinea pig), 795
protein-energy
copper supplementation, 898
nitrogen balance and, 930
Manganese, erythrocyte, measurements in Japan, 457
Marasmus, copper supplementation,
Mass spectrometry, isotopic sampling and administration in constant infusion experiments, 1004
Meat, protein, calcium metabolism and, 924
Menarche, reproductive histories of low weight women, 862
Menstruation, vitamin fluctuations in blood in relation to (baboon), 518
Milk
breast, intake, determination, 996
colostrum versus mature (rat), 52
composition, during weaning, 61
human
changing patterns of milk lipids during lactation, 612
copper, iron, and zinc content, 443
nutritional composition, 810
vitamin B_6, 867
Minerals, urinary, excretion in adult males, 8
Monocytes, effect of Intralipid on, 256
Monosodium glutamate
effect of carbohydrate on plasma and erythrocyte glutamate levels in humans ingesting large doses of, 961
modulating effect or Sustagen on plasma glutamate concentration in humans ingesting, 194
Mortality, rates, dietary changes and, 685, 687
Muscle
function, during diets and fasting, 133
mass, creatinine method (humans), 478

Nitrogen, balance, parenteral nutrition and, 930
Nutrient intake, estimation, sources of variation in dietary recall data, 986
Nutrient requirements, exercise and riboflavin, 509
Nutrition
appraisal of "*Diet, Nutrition, and Cancer,*" 495
assessment, visceral proteins in alcoholics, 216
comparison of dietary methods, 300
home parenteral, water soluble vitamins in, 421
infant, determination of breast milk intake, 996
marginal malnutrition in Colombian boys, 119
parenteral
containing dicarboxylic amino acids, effects in infants, 99
nitrogen balance and, 930
relationship between American Society for Clinical Nutrition and American Institute of Nutrition, 499
research, 166
studies, comparison of dietary methods, 300
total parenteral
biotin deficiency in, 185
cyst(e)ine measurements during, 188
selenium deficiency in, 319
sulfate as factor in hypercalcuria associated with, 108
Nutrition surveys
ethnic sales of high-sugar products, 622
Mexican children, 1010
Nutritional status, anthropometry of Mexican-American migrant children in northern California, 828

Obesity
dietary-induced, effect on energy balance regulation (rat), 387
energy, macronutrient intake and, 295
estimates of daily energy expenditure, 468
high and low energy density diets, 763
medium-chain triglyceride diet impedes fat deposition, 1
normal thermic effect of glucose in, 87
nutritional induction of adipose tissue lipoprotein lipase in, 974
resting metabolic rate, 595
water content of lean tissue and body fat estimation, 663
Oral contraceptives, ascorbic acid and, 329, 330
Overfeeding, with medium-chain triglyceride diet results in diminished deposition of fat, 1
Oxygen
consumption and elemental nutriture, 407
estimates of daily energy expenditure, 468
normal thermic effect of glucose in obese women, 87

Pancreas
effect of dietary fat (rat), 361
insufficiency, zinc in, 268
Parasites, nutritional status of Mexican children, 1010
Parenteral nutrition
containing dicarboxylic amino acids, effects in infants, 99
home, water soluble vitamins in, 421
nitrogen balance and, 930
total
biotin deficiency in, 185
cyst(e)ine measurements during, 188
selenium deficiency in, 319
sulfate as factor in hypercalciuria associated with, 108
Pectin
dietary fiber, mucosal growth, cell proliferation in intestine (rat), 954
digestion in humans, 253
Peroxidative, damage, in iron deficiency, 26
Phagocytes, mononuclear and polymorphonuclear effect of Intralipid on, 256
Phenylketonuria, infants and children, protein requirements, 778
Phospholipids, changing patterns of human milk lipids during lactation, 612
Phosphorus, excretion in adult males, 8
Pituitary, wound healing and thymotropic effects of arginine, 786

Placenta, vitamin nutriture, 969
Plasma cholesterol
  dietary fats and, 355
  level, determinant of glucose tolerance, 155
Plasma lipids, effects of coarse wheat bran fiber and exercise on, 71
Platelets
  bioavailability of selenium to Finnish men as assessed by, 887
  in diabetes, 641
  vitamin E in, 867
Poisoning, selenium, in China (human), 872
Polyester, sucrose, in hypercholesterolemia, 339, 347
Potassium
  role in low blood pressure in vegetarians, 755
  sodium balance and, 583
Pregnancy
  iron supplementation in, 429
  maternal sodium restriction and pup brain growth, 43
  vitamin nutriture in placental tissue of women, 969
  zinc and, 429
  zinc supplementation, 572
Presidential Address, 499
Protein
  depletion, immune responses (guinea pig), 795
  dietary, mineral utilization and, 8
  effect of coingestion of fat on glucose, insulin, and gastric inhibitory polypeptide responses to, 941
  meat, calcium metabolism and, 924
  requirements, children with phenylketonuria, 778
  retinol-binding, vitamin A in blood, 147
  synthesis, acidosis and whole body nitrogen kinetics, 201
  visceral, in alcoholics, 216
Protein-calorie malnutrition, immune responses (guinea pig), 795
Protein-energy malnutrition
  copper supplementation, 898
  nitrogen balance and, 930

Radioisotopes, infusion experiments, 1004
Red cells, vitamin B_{12} analogues (human), 774
Refeeding, after fasting (rat), 387, 396
Repletion, in vivo, impairment of blastogenic response of splenic lymphocytes from iron-deficient mice, 15
Reproduction, histories of low weight women, 862
Resting metabolic rate, obesity, 595
Retinol, vitamin A in blood, 147
Riboflavin, requirements, and exercise, 509

Satiety, effects of high and low energy density diets, 763
Secretory immunity, maternal nutritional status on immunological substances in human colostrum and milk, 632
Selenium
  bioavailability, Finnish men, 887
  deficiency, in total parenteral nutrition, 319
  status of vegetarians, nonvegetarians, and cancer patients, 114
  toxicity in China (human), 872
Senility, vitamin B_6 and copper deficiency indicating aging of brain, 540
Sitosterol, lymphatic absorption, 805
Sodium
  potassium balance and, 583
  restriction, maternal, pup brain growth, 43
Starch, leguminous, rate of hydrolysis, 66
Staub-Traugott effect, dietary carbohydrate and second meal glycemic response, 152, 153
Stigmasterol, lymphatic absorption, 805
Streptozotocin, -induced diabetes, zinc status (mice), 382
Sucrose, ethnic sales of high-sugar products, 622
Sucrose polyester, in hypercholesterolemia, 339, 347
Sulfate, factor in hypercalciuria associated with total parenteral nutrition, 108
Superoxide dismutase supplementation, effect on tissue levels, 5
Survey techniques, food intake measurement, 139
Sustagen, modulating effect on plasma glutamate concentration in humans ingesting monosodium L-glutamate, 194

Taurine, prevents cholestasis induced by lithocholic acid sulfate in guinea pigs, 221
Test-weighing procedure, determination of breast milk intake, 996
Thermogenesis
  effect of dietary-induced obesity on energy balance regulation (rat), 387
  normal thermic effect of glucose in obese women, 87
  stimulation, after glucose-long-chain triglyceride infusion, 603
Thyroid, resting metabolic rate in obesity, 595
Tin, interaction with zinc, 566
Tissue, levels, effect of superoxide dismutase, 5
Tocopherol
  human blood plasma and platelets, 1020
  in diabetes, 641
Trace elements, human milk, 443
Transferrin, restoration of blastogenesis by, in iron-deficient lymphocytes (mice), 557
Triglyceride
  blood lipid distribution of hyperinsulinemic men consuming fructose, 740
  changing patterns of human milk lipids during lactation, 612
  long-chain, infusion, thermogenesis after, 603
  medium-chain, diet, impedes fat deposition, 1
  mobilization, from human adipocytes during weight reduction, 749

Uremia, vitamin D absorption in azotemic rats, 403

Vegetarianism
  bone mineral mass in males, 453
  growth in children, 815
  ischemic heart disease, iron and, 882, 883
  low blood pressure and potassium, 755
Vegetarians, selenium status, 114
Venous blood, measurements of circulating ferritin, 307
Vitamins
  fluctuations in blood in relation to menstrual cycles, and treatments with contraceptives (baboon), 518
  nutriture, in placental tissue of women, 969
  saturation indices, for riboflavin, thiamin, and pyridoxine in placental tissue of women, 969
  water soluble, in home parenteral nutrition, 421

Vitamin A
in blood, 147
serum, levels, 885
Vitamin B_6
deficiency, aging of brain, 540
human milk, 867
Vitamin B_{12}
analogues, in human red cells, liver, and brain, 774
deficiency, megaloblastic anemia in Israel, 855
Vitamin C
cervical dysplasia, 332
status, healthy elderly, 329, 332
Vitamin D, absorption in azotemic rats, 403
Vitamin E
human blood plasma and platelets, 1020
in diabetes, 641

Water, hardness, hair zinc levels and, 37
Weaning, human milk nutrients during, 61
Weight
elbow breadth as measure of frame size, 311
food consumption, activity, body fatness and, 278
loss
high and low energy density diets, 763
sucrose polyester and hypercholesterolemia, 347
reduction, mobilization of triglyceride from human adipocytes during, 749
vegetarian children, 815
Wheat bran, bioavailability of iron from, 31
Whole body counting, in absorption and retention studies, 652
Wound healing, arginine, 786

Xerophthalmia, community nutritional status and, 645

Zinc
bioavailability (humans), 566
concentration of serum and hair in pregnancy, 572
content of human milk, 443
deficiency, pancreatic insufficiency and, 268
excretion in adult males, 8
hair, levels, water hardness and, 37
interaction with tin, 566
oxygen consumption and, 407
pregnancy and, 429
serum, cholesterol decreases level, 918
status, diabetes and (mice), 382
supplementation in pregnancy, 572
tolerance test, pancreatic insufficiency and, 268
